RE: **SIDNEY LANDFILL (CLOSED), RICHLAND COUNTY – LICENSE NO. 102**
GROUND WATER MONITORING –RECEIPT AND REVIEW OF THE MAY 2003
SAMPLING EVENT.

Dear Mr. Huotari:

The Department has reviewed the ground water data from the May 2003 monitoring/sampling event conducted at the closed Sidney Landfill. As Mr. Kelly Logan, R.S. mentioned in his summary-memorandum dated July 15, 2003, "Analytical results are similar to the past sampling events".

The facility remains in the corrective measures phase of ground water monitoring. The Department would note the following: tetrachloroethene is equal to, or over the maximum contaminant levels (MCL) in monitoring wells SL-2, SL-3, and SL-4. Also, since April 27, 2001, tetrachloroethene concentrations have been increasing in SL-3.

We find the historical data tabulation included in the report submittal very helpful in our review, and appreciate the time and effort Mr. Logan puts into preparing these documents every six months.

I may be contacted at the Permitting and Compliance Division, Community Services Bureau, Waste Management Section, phone (406)444-0538.

Sincerely,

Pat Potts – Environmental Specialist
Solid Waste Program
